SACRAMENTO, CA 942283-0001

PROJECT DESCRIPTION:
Analysis of 20 Additional Beds as an Addendum to the Adopted Mitigated Negative Declaration for the 25-Bed Acute/Intermediate Mental Health Care Facility at California Institution for Women

PROJECT TITLE:	**STATE CLEARINGHOUSE NUMBER**
25-Bed Acute/Intermediate Mental Health Care Facility	2006101010
PROJECT LOCATION:	**DEPARTMENT CONTACT:**
CIW 16756 Chino-Corona Road Corona CA 92878, San Bernardino County	Nancy MacKenzie Chief (Acting), Environmental Planning Unit
COUNTY	**CONTACT PHONE NUMBER**
San Bernardino	(916) 255-2159

PROJECT DESCRIPTION: Pursuant to Sections 15162(a) and (b) and 15164(b) of the California Environmental Quality Act (CEQA) Guidelines, CDCR has prepared an Addendum to the 25-Bed Acute/Intermediate Mental Health Care Facility for California Institution for Women's Mitigated Negative Declaration (MND) because of modifications made to the project that are described in the Addendum. The purpose of these modifications is to expand the size of the facility to accommodate 45 single-occupancy cells in a 60,479 square-foot, two-story structure (45-bed facility). The modified project does not substantially differ and does not raise important new issues about the significant impacts on the environment beyond those previously analyzed in the MND adopted on November 7, 2006. Therefore, the CDCR can take action on the project as being within the scope of the MND.

This is to advise that the CDCR as Lead Agency has determined that modifications to the project associated with the 25-Bed Acute/Intermediate Mental Health Care Facility project and any altered conditions since adoption of the MND on November 7, 2006 would:

1. not result in any new significant environmental effects and would not substantially increase the severity of previously identified effects.
2. In addition, mitigation measures previously identified for biological and cultural resources would still be applicable under the modified project, and impacts would not be more severe as the project footprint would not change.

Because no additional significant impacts or associated mitigation measures have been identified that were not previously identified as part of the adopted MND for the 25-bed Acute/Intermediate Mental Health Facility (25-bed facility), an Addendum to the MND consistent with Sections 15162(a) and (b) and 15164(b) of the CEQA Guidelines, is the appropriate mechanism to address the proposed project modifications and no further environmental review is required.
