JAIL PROFILE SURVEY

EXPLANATION OF RESULTS

The following link titles contain the Jail Profile Survey results for the third quarter of the calendar year 2008. **Quarterly Totals** contains the third quarter totals based upon the monthly and quarterly data submitted to us by the participating jurisdictions. The next six (6) link titles show the trend data for variables we have been tracking for the last ten years (**Average Number of Persons Booked**, **Average Length of Stay**, **Average Daily Population**, **Percentage Non-Sentenced**, **Non-Sentenced ADP**, and **Sentenced ADP**). The remainder of this page provides explanations and clarifications of the data presented.

Quarterly Totals link

- Unless otherwise noted, "projected totals" are based upon the average per day for the variable in question. For example, there was an average of 82,748 inmates per day in local jails (excluding Type I's) during the three-month span of July thru September 2008.

- For some variables (other than ADP), we did not receive complete data from all jurisdictions. In such instances, we used statistical procedures to estimate the statewide total.

- The number for "Bookings" is the average of the monthly totals for July, August, and September.

- For the following variables, the numbers presented are the totals as of the mid-quarter (i.e., August 15, 2008); Pretrial Release, Early Release, 2 and 3 Strikes, Felony Warrants, Misdemeanor Warrants, Juveniles in Custody and Undocumented Aliens.

- "Assaults" is the total number of serious inmate assaults on staff (resulting in a crime report), statewide, during the third quarter of calendar year 2008.

Average Number of Persons Booked, **Average Length of Stay**, **Average Daily Population**, **Percentage Non-Sentenced**, **Non-Sentenced ADP**, and **Sentenced ADP** links

- The data in the 10-Year Summary tables are based upon survey data which the Corrections Standards Authority has gathered since the early 1980's.

- Prior to 1995, yearly averages were reported to the CSA on an annual basis. Yearly averages from 1996 to the present time have been the average of the 12 calendar months. In 1995, the yearly figure reported is the fourth quarter average, since we do not have data from the first three quarters.
