# **HISTORICAL TRENDS**

## **CALIFORNIA DEPARTMENT OF CORRECTIONS**

### **1979-1999**

This report presents some basic information about the California Department of Corrections' (CDC) prisoners and parolees. Historical trend information covering the past twenty years is presented in graphs and tables for various offender characteristics and the institutional design bed capacity.

#### **Institution Population**

Figure 1 and Table 1 show the number of CDC offenders incarcerated in a California state prison, conservation camp, community correctional center, or Department of Mental Health hospital. The institution population grew from 22,632 in 1979 to 160,687 in 1999. The annual increase of 1,124 in 1999 was the smallest annual numerical increase in population since 1977. In 1977 the population experienced a decrease of 1,465 from the previous year.

#### **Racial/Ethnic Composition**

Figure 2 and Table 2 present information on the racial/ethnic composition of the institution population during the 1979 to 1999 time period. White male inmates dropped from 40 percent of the male institution population in 1979 to 29 percent in 1990. The white male population has remained at this percentage since then. A major shift in racial composition was related to an increase in the percentage of Hispanic (Mexican) male inmates, which went from 24 percent in 1979 to about 35 percent in 1994. Since 1994, the racial/ethnic composition of the male population has stabilized at 29 percent White, 31 percent Black, 35 percent Hispanic, and 5 percent Other.

#### **Institution Population by Offense Category**

Figure 3 and Table 3 show the change in the percentage of felon inmates incarcerated for person, property, drug, and other offenses. The percent of female felons incarcerated for person crimes decreased by 46 percent from 1979 (44.5 percent) to 1999 (24.1 percent), while drug crimes increased by over 100 percent (19.5 percent to 43.0 percent).

#### **New Admissions by Offense Category**

Figure 4 and Table 4 show the rate of felon new admissions by type of offense. From 1979 to 1999 the rate of felon new admissions increased from 42.5 to 126.1 per 100,000 California population. The 1999 rate is the lowest rate of admissions since 1991.

## **Parole Violators Returned to Prison**

Figure 5 and Table 5 present information on the number of felon parole violators returned to prison. The total number increased from 2,558 in 1979 to 88,040 in 1999.

## **Admission/Return Status**

Figure 6 and Table 6 show New Admissions, Parole Violators-Returned to Custody (PV-RTCs) and Parole Violators-With New Terms (PV-WNTs) as a percentage of the overall felon population. From 1979 to 1999, male parole violators increased from about 17 percent of the male felon population to 42 percent.

## **Felon Parole and Civil Narcotic Outpatient Population**

Figure 7 and Table 7 show the overall growth in the felon parole and civil narcotic addict (CNA) outpatient population. Total felon parolees increased by well over 100,000 parolees in twenty years--from 10,000 parolees in 1979 to over 115,000 parolees in 1999.

## **Releases to Parole**

Figure 8 and Table 8 present information on the total number of felons released to parole each year. The number of releases to parole increased from about 10,000 releases in 1979 to over 126,000 releases in 1999.

## **Average Time Served on Prison Sentence**

Figure 9 and Table 9 show the change in the average (median) months of time served on their prison sentence by felons first released to parole. Between 1979 and 1994, the time served for male felons had decreased from 25 months to a low of 16 months (1990 through 1994). It then progressively grew to 19 months in 1996 and has remained there since.

## **Design Bed Capacity and Population**

Figure 10 and Table 10 show the change in the design bed capacity of CDC facilities, the institution population, and the rate of occupancy from June 30, 1979 to June 30, 1999. From 1979 to 1999, design bed capacity increased threefold and the percent occupied more than doubled.

*This document was prepared by Corinne Slapnik, with assistance by the Data Analysis Unit personnel. In summarizing the data, efforts were made to maintain a reasonable consistency among years as various definitions of data elements changed. Numbers used in the report may not add to totals due to independent rounding.*

\* INSTITUTION POPULATION includes offenders sentenced to state prison who are incarcerated in a state prison, conservation camp, community correctional center, or Department of Mental Health hospital.

\*\* CNA -- Civil Narcotic Addicts.

\*\*\*OTHER includes Youth Authority wards, county diagnostic cases, safekeepers and prisoners from other states or the federal prison system.

\* Design capacity is the number of inmates a facility was originally designed to house. Increases or decreases indicate beds lost or gained due to conversions, additions, or deactivation.

\*\*Rate of occupancy = population divided by number of design beds multiplied by 100.
