Executive Summary

BACKGROUND

To comply with requirements specified in the CDCR Division of Juvenile Justice (DJJ) Safety and Welfare Remedial Plan, the Office of Research, Juvenile Research Branch (JRB), is responsible for producing a monthly report to monitor the Disciplinary Decision-Making System (DDMS) Projected Board Date (PBD) extensions and restorations and PBD extensions for treatment/training and program credits for youth who are housed in DJJ facilities/camps, the Department of Mental Health (DMH), and the Division of Adult Institutions (DAI).

This report provides the DDMS and Program data that were processed into the Offender-Based Information Tracking System (OBITS) from January 2009 through December 2009 and tracks the monthly DDMS and Program time extended to / subtracted from PBDs for first admissions and recommitments, as well as for parole violators.

FINDINGS

DJJ Facilities/Camps

✓ The overall annualized trend shows a decrease in the number of youth who received DDMS PBD extensions. The greatest number of youth received DDMS PBD extensions in February 2009 (110 youth) and the least number of youth received DDMS PBD extensions in November 2009 (21 youth). The average number of months extended per youth remained stable throughout the year, ranging from 1.60 to 2.76 months.

✓ The number of youth with DDMS PBD restorations fluctuated throughout the year, with the greatest number of youth receiving DDMS PBD restorations in December 2009 (15 youth each month). The average number of months restored per youth remained stable, ranging from 1.00 to 2.20 months.

✓ The overall annualized trend shows no change in the number of youth who received PBD extensions for treatment/training. With the exception of April and October 2009, less than 50 youth per month received PBD extensions. The average number of months extended per youth increased slightly toward the end of the year, ranging from 2.94 to 5.46 months. The majority of treatment/training PBD extensions were attributed to “youth” reasons or parole being denied. Few extensions were attributed to “staff” or “extended” (i.e., EPRD past PBD and WIC 1800) reasons.

✓ The overall annualized trend shows an increase in the number of youth who received program credits. The least number of youth received program credits in January 2009 (19 youth) and the greatest number of youth received program credits in October 2009 (80 youth). With few exceptions, the average number of months credited per youth remained stable throughout the year, ranging from 2.02 to 2.50 months.

Division of Adult Institutions (DAI)

- ✓ Only 17 youth incarcerated in the DAI received DDMS PBD extensions. The average number of months extended per youth ranged from 1 to 3.33 months.
- ✓ No DDMS time was restored for youth incarcerated in the DAI.
- ✓ Less than ten youth per month housed in the DAI received PBD extensions for treatment/training. (The exception was in March 2009, when 11 youth received a treatment/training PBD extension.) Overall, the average number of months extended per youth was higher for those in DAI than in DJJ, ranging from a low of 2.75 to a high of 9.5 months. The majority of treatment/training PBD extensions were attributed to “youth” or “extended” reasons. Few were attributed to staff reasons or parole being denied.
- ✓ Only 17 youth incarcerated in the DAI received program credits. The average number of months credited ranged from 1 to 3 months.

Department of Mental Health (DMH)

- ✓ No DDMS time was extended for youth living in a DMH facility.
- ✓ No DDMS time was restored for youth living in a DMH facility.
- ✓ Only 3 youth received a PBD extension for treatment/training, with 2 youth having an average of 6 months added for “youth” reasons and 1 youth having an average of 24 months added for “extended” reasons.
- ✓ Only 2 youth living in DMH facilities received a 1 month program credit each from January 2009 to December 2009.

Parole Violators

- ✓ On December 15, 2008, DJJ complied with the LH lawsuit mandates for parole violators by tracking *revocation extensions* in lieu of *DDMS extensions*. Since this date, 36 youth have received revocation extensions, with the average number of months added to revocation release dates (RRDs) ranging from 1.5 months to 6 months.
- ✓ The overall annualized trend shows an increase in the number of parole violators who received program credits. Through March 2009, less than 10 youth per month received program credits. From April through July 2009, the number almost doubled each month and then began to fluctuate slightly after July 2009. The average number of months credited per parole violator remained stable, ranging from 1 to 1.60 months.

DISCUSSION

These findings show that the DJJ continues to make substantial progress in the areas of DDMS PBD extensions, as well as treatment/training program credits, as set forth in the Farrell Safety and Welfare Remedial Plan.

BACKGROUND

While in the Division of Juvenile Justice (DJJ), youthful offenders may have time extended to or subtracted from their facility commitment [as measured by their projected board dates (PBDs), formerly referred to as parole consideration dates]. Adjustments to a youth's PBD are most often based on his/her willingness to follow the rules and participate in rehabilitative programming. However, in the past, adjustments were also made based on system-level issues unrelated to youth performance during incarceration. The Farrell vs. Hickman (currently Farrell vs. Cate) lawsuit served as an impetus to bring this issue forward. To support the efforts of the Farrell reform requirements, DJJ targeted the PBD adjustment process for quality improvement in the CDCR DJJ Safety and Welfare Remedial Plan¹:

There is no tracking system in place to measure changes in the net amount of time added to Projected Board Dates. Acceleration of Projected Board Dates through the Ward Incentive Program should be considered an offset to time adds. To measure this, DJJ will develop a system to simultaneously report on time extensions by type of time add and accelerated projected board dates. A separate report will be prepared every month for each facility and for the division as a whole. Each report will show the total number of months of time adds by type of time add for that month and for the year to date, the total number of months of accelerated projected board dates as a result of earned program credits and restoration of disciplinary time for that month and for the year to date, and the net amount of disciplinary time added (or subtracted) for the month and for the year. These reports will show data both numerically and graphically and be included as part of the regular agenda at staff meetings at facilities and headquarters (p. 74).

Beginning in July 2008, the CDCR Office of Research, Juvenile Research Branch (JRB), was tasked with initiating the production of monthly reports designed to satisfy these requirements. To produce these reports, data were extracted from the Offender-Based Information Tracking System (OBITS), which records youth demographics, tracks youth movement within and between facilities, tracks the occurrence and processing of youth behavioral violations [called Disciplinary Decision-Making System (DDMS) incidents], and collects other important information including time extended to or subtracted from PBDs based on program participation. After one year, DJJ and JRB staff convened to assess the utility, accuracy, content and format of these reports to identify and target areas for improvement. This report reflects the feedback generated from this collaborative effort.

¹ California Department of Corrections and Rehabilitation, Division of Juvenile Justice, Safety and Welfare Remedial Plan: Implementing Reform in California, July 10, 2006, http://www.cdcr.ca.gov/Juvenile_Justice/docs/SafetyWelfarePlan.pdf.

Report Description

This report is composed of several data summary tables and charts showing monthly DDMS and Program time added/subtracted to youth PBDs. Specifically, summaries are provided for the following:

- All DJJ Facilities Combined
- Each Individual Facility/Camp:
 - Southern Youth Correctional Reception Center and Clinic
 - N.A. Chaderjian Youth Correctional Facility
 - O.H. Close Youth Correctional Facility
 - Preston Youth Correctional Facility
 - Heman G. Stark Youth Correctional Facility
 - Ventura Youth Correctional Facility
 - Pine Grove Youth Conservation Camp
 - Sylvester Carraway Public Service and Fire Center (also known as Ventura Camp)
- The Division of Adult Institutions (DAI)
- The Department of Mental Health (DMH)

Each sub-report produced is comprised of the following:

- A table tracking the monthly PBD extensions/restorations due to DDMS behavioral infractions for *first commitments and commitments*.

Based on the information shown in this table, separate bar charts are provided to summarize:

- the number and percentage of youth who received a DDMS PBD extension for *first commitments and commitments*.
- the number of youth who received DDMS PBD restorations for *first commitments and commitments*.
- the net number of months of DDMS PBD extensions and restorations for *first commitments and commitments*.
- the average number of DDMS PBD extension months added per youth for *first commitments and commitments*.
- the average number of DDMS PBD months restored per youth for *first commitments and commitments*.

- A table tracking the monthly PBD extensions for treatment/training (also referred to as “program”) / program credits for *first commitments and recommitments*.

Based on the information shown in this table, separate bar charts are provided to summarize:

- the number and percentage of youth who received a treatment/training PBD extension for *first commitments and recommitments*.
 - the number of youth who received treatment/training PBD credits for *first commitments and recommitments*.
 - the net number of months of treatment/training PBD extensions and credits for *first commitments and recommitments*.
 - the average number of treatment/training PBD extension months added per youth for *first commitments and recommitments*.
 - the average number of program credits per youth for *first commitments and recommitments*.
 - the PBD extensions by the reason for the extensions.
- A table tracking the monthly revocation extensions and program credits for *parole violators*.
 - A table tracking the monthly time added due to rehabilitative programming (referred to as “program”) for *parole violators*. (Note: Data are only available through December 2008 as parole violators stopped receiving treatment/training extensions as of December 15, 2008.)

The DDMS table for the first commitments / recommitments shows the average daily population (ADP)² for “YA” (or DJJ) cases only, the number of DDMS PBD extension/restoration hearings, the number of youth who had a DDMS PBD extension/restoration, and the number of months extended/restored for the DDMS. Averages are calculated for the number of DDMS PBD extension/restoration months per hearing and per youth. The bar charts summarize the DDMS PBD extensions/restorations for first commitments and recommitments for each month examined.

The Program table shows the average daily population (ADP)² for “YA” (or DJJ) cases only, the number of PBD extensions for treatment/training and program credit hearings, the number of youth who had PBD extensions for treatment/training and program credits, and the number of months extended for treatment/training and subtracted for program credits. Averages are calculated for the number of Program months extended/credited per hearing and per youth. These results are presented for both first commitments / recommitments, as well as for parole violators. (Note: As of December

² ADP was not calculated for DMH parole violators since parole violators are not returned to DMH.

15, 2008, parole violators no longer receive PBD Extensions for DDMS or treatment/training.) The bar charts summarize the PBD extensions for treatment/training and program credits for first commitments and recommitments for each month examined.

To support DJJ oversight activities, the PBD extensions for treatment/training were further categorized by the reason for the extension. Program PBD extensions for treatment/training may be given for youth reasons (i.e., risk to re-offend or danger to public; additional time needed to accomplish / gain / demonstrate progress; additional time needed to develop education and/or employability skills; and current needs cannot be met on parole), facility staff reasons (i.e., board reports not completed in timely manner; parole placement plans not received; registrations/notifications not completed in timely manner; and correction pending), parole being denied, or extended reasons [i.e., dual commitment with estimated possible release date (EPRD) past PBD and WIC 1800].

Finally, the monthly revocation extensions and program credits table for *parole violators* tracks the average daily population (ADP)³ for “YA” (or DJJ) cases only, the number of revocation extension / program credit hearings, the number of youth who had revocation extensions/ program credits, and the number of months either extended as a result of the revocation or credited. Averages are calculated for the number of revocation extensions / program credits months per hearing and per youth. (Note: A table tracking the monthly time added due to rehabilitative programming is included for historical purposes. Parole violators stopped receiving treatment/training extensions as of December 15, 2008.)

JRB Contact Information

This report was produced by the CDCR Office of Research, Juvenile Research Branch (JRB) on February 25, 2010. Questions regarding this report may be directed to the JRB at JRB_Requests@cdcr.ca.gov.

³ ADP was not calculated for DMH parole violators since parole violators are not returned to DMH.
