# **HISTORICAL TRENDS**

## **CALIFORNIA DEPARTMENT OF CORRECTIONS AND REHABILITATION**

### **1985 - 2005**

This report presents some basic information about the California Department of Corrections and Rehabilitation's (CDCR) prisoners and parolees. Historical trend information covering the past twenty years is presented in graphs and tables for various offender characteristics and the institutional design bed capacity.

#### **Institution Population**

Figure 1 and Table 1 show the number of CDCR offenders incarcerated in California State prisons, conservation camps, community correctional centers, or Department of Mental Health hospitals. The institution population grew from 50,111 in 1985 to 168,035 in 2005. This table shows an increase of 4,096 in 2005, which nearly doubles last year's increase of 2,154. The male felon population shows a 2.4% increase of 3,632 over the last year. An increase of 405 caused the female felon population to increase by nearly 4% in 2005.

#### **Racial/Ethnic Composition**

Figure 2 and Table 2 illustrate the racial/ethnic composition of the institution population during the 1985 to 2005 time period. Shifts in racial composition have been related to the influx of the male Hispanic population compared to other groups. Over the last 20 years, we have continued to see the male Hispanic population rise from 27.6% in 1985 to 38.1% in 2005, while the White and Black male populations have both continued to decline over the same period. The female composition has stayed basically the same throughout the last 20 years, with the exception of a 5% spike in the 1989 Black population, since then, that population steadily declined back to the composition of 20 years ago.

#### **Institution Population by Offense Category**

Figure 3 and Table 3 show the change in the percentage of felon inmates incarcerated for person, property, drug, and other offenses. From 1985 until 1997, there had been a general decrease in person offenses, but since 1998 we have seen a continuous increase of almost 6%. Property crimes for the male population have remained fairly steady since 1999, at approximately 20%. However, property crimes for the female population increased over 7% from 1999 to 2004, then decreased by almost 1% in 2005. Drug offenses have continued to decrease during the last 7 years for the entire population.

#### **New Admissions by Offense Category**

Figure 4 and Table 4 show the rate of felon new admissions by type of offense. From 1985 to 2005, the rate of felon new admissions increased from 77.81 to 131.88 per 100,000 of the California population. After experiencing a downturn in admissions from 1998 to 2001, there has been a steady increase in new admissions over the last 4 years.

#### **Parole Violators Returned to Prison**

Figure 5 and Table 5 illustrate the number of felon parole violators returned to prison. From 1985 through 2001, the Parole Violators Returned to Custody (PV-RTC's) was on a continuous incline and the Parole Violators With a New Term (PV-WNT's) continued to rise until 1999. The PV-WNT's have seen an increase in the past several years, while the total Parole Violator population began to decrease in 2001 and only began increasing again in 2005.

### Admission/Return Status

Figure 6 and Table 6 show new admissions, Parole Violators-Returned to Custody (PV-RTC's) and Parole Violators-With New Terms (PV-WNT's) as a percentage of the overall felon institution population. From 2002 to 2005, there has been a gradual decline in the percent of male and female PV-RTC's. The percent of new admissions has decreased about 8 percentage points the last 20 years. There has been moderate growth in the male and female institution populations during the past 4 years, with an extreme increase of 4,037 during the past year.

### Felon Parole and Civil Narcotic Outpatient Population

Figure 7 and Table 7 show the overall growth in the felon parole and Civil Narcotic Addict (CNA) outpatient population. Total felon parolees increased by 84,138 parolees in 20 years - from 29,061 parolees in 1985 to 113,199 parolees in 2005. There has been a decrease over the last 4 years of 937 in the CNA outpatient population. The felon parolee population showed a slight increase in 2005, after 3 consecutive years of decline.

### Releases to Parole

Figure 8 and Table 8 present information on the total number of felon releases to parole each year. From 1985 to 1999 there was a steady rise in felon releases to parole. The number of releases to parole from 1999 to 2001 had a zero percent fluctuation, hovering at about 126,000 total releases to parole. There had been a fairly large decrease in the number of felon releases to parole from 2002 to 2003, with a total of about 10,000 or 9% fewer felons being released to parole; however, the 2005 Calendar Year showed a 4% increase over the prior year in releases.

### Average Time Served on Prison Sentence

Figure 9 and Table 9 show the change in the average (median) months of time served on their prison sentence by felons first released to parole. Between 1985 and 1990, the time served for male felons steadily declined from 22 months to a low of 16 months, where it leveled off through 1994. It again increased between 1994 and 1996, to approximately 19 months, where it remained until the last 2 years, ultimately dropping to 16 months in 2005, for the male population. The average time served for the female population went from a 17 months in 1985 to a low of 13 months by 1994. It then rose to 14 months in 1995, where it remained constant until the last 2 years, where it has remained at 13 months.

### Design Bed Capacity and Population

Figure 10 and Table 10 show the change in the design bed capacity of CDCR facilities, the institution population, and the rate of occupancy from June 30, 1985 to June 30, 2005. From 1985 to 1998, design bed capacity increased nearly threefold. From 1998 to 2005 the capacity has remained virtually unchanged at about 80,000 inmates. The institution population has increased more than threefold from 45,528 inmates in 1985 to 158,837 inmates in 2005. The rate of occupancy increased 39.3% from 1985 to 2005, with a rate of occupancy of 196.1% as of June 30, 2005.

*This document was prepared by Stephen Krimetz, Offender Information Services Branch. In summarizing the data, efforts were made to maintain a reasonable consistency among years as various definitions of data elements changed. Numbers and percents used in the report may not add to totals due to independent rounding.*

\* INSTITUTION POPULATION includes offenders sentenced to state prison who are incarcerated in a state prison, conservation camp, community correctional center, or Department of Mental Health hospital.

\*\* CNA -- Civil Narcotic Addict.

\*\*\* OTHERS includes Youth Authority wards, county diagnostic cases, safe keepers and prisoners from other states or the federal prison system.

\* Population estimates are from the Demographic Research Unit, California Department of Finance.

\*\* OTHER includes all offenses that do not fall under the Person, Property, or Drug types and any felon new admission with missing offense data.

\*\*\* This report reflects New Admissions ONLY. PVWNT's were inadvertently added to the totals for 2001, 2002 and 2003 and have since been removed.

\* Design bed capacity is the number of inmates a facility was originally designed to house. Increases or decreases indicate beds lost or gained due to conversions, additions, or deactivation.

\*\*Rate of occupancy = population divided by number of design beds multiplied by 100.
