**Symptoms**

**Interview Patient Immediately!**
Assess for coughing, fever, shortness of breath, fatigue. Ask patient how long they have had these symptoms & who they have had contact with.

**Isolate & Instruct**
Instruct to remain in cell or isolation area, wash hands in & out of cell, when coughing use tissue & discard or cover mouth with elbows. Complete a 7362 if symptoms worsen.

**Calls & Cancellations**
Cancel all appointments and patient movement. Call and notify the PHN, PCP and Custody of patient restrictions. Screen roommates.

**Keep patients protected**
Keep patient isolated & roommates quarantined. Keep screening and monitoring patients/roommates for worsening symptoms. Take temperatures twice daily.

**Quick Tips**

- See all patients immediately, regardless of refusals. A cell front assessment is required.
- Provide a mask to coughing patients prior to any interviews or interaction.
- Teach proper handwashing & ensure patients have hand soaps and tissue in cell and dorms.
- Educate patients on social distancing.
- Explain to patient the importance of preventing the disease from spreading (Quarantine Vs. Isolation).
- Provide reassurance to the patient.
- Utilize current processes for identifying patients i.e. 7362, clinical rounds etc.
- Remember to quarantine patients for 14 days who have been in contact with someone who had symptoms of ILI or is in isolation for COVID-19.
- Isolate patients with new or worsening symptoms or temperatures of 100 F and above.
