ALL RESIDENTS OF CDCR CORRECTIONAL INSTITUTIONS SHOULD COMPLETE A DAILY SELF-SCREENING FOR COVID-19 SYMPTOMS AND EXPOSURES.

UPDATED FEB. 15, 2022

VACCINATION

The incarcerated population who are not vaccinated or do not have an approved religious or medical exemption are ineligible for camp placement or other Off-Site Work Detail assignments.

**Fully Vaccinated** is defined as being 14 days past the last injection of a series.

TESTING

If an incarcerated fire crew member is suspected or confirmed to be positive for COVID-19, they will be transported to the closest appropriate institution with celled housing for quarantine/isolation placement.

Additionally, when a conservation camp is placed on quarantine, the incarcerated population housed at the camp will be monitored for symptoms.

MASKING

Residents who have work assignments that include indoor contact with others are required to be fit-tested and wear N95 masks in those settings and shall be provided replacements at the beginning of each work shift and as often as needed or requested.

**During Contingency Staffing Operations**

Asymptomatic incarcerated critical workers may continue to work as long as they have a negative point-of care-test on each day they are working in that 10-day timeframe, a negative PCR on day 10, and must be FIT tested and wear an N95 covering in designated areas (isolation and quarantine space), otherwise wearing a KN95 while working.
