Moving to quarantine or isolation due to COVID-19 can be stressful & inconvenient. These moves are temporary and meant to protect you and the people you care about.

Your health is our top priority.

Even if you experience mild symptoms, your visitor or cellmate may not be so lucky.

Testing is crucial to containing an outbreak. If you are asked to test, please do. If you start to feel symptoms, tell a staff member immediately.

There are new treatments available that can greatly reduce the risk that infected people will be hospitalized or die from COVID-19.

We can’t stop COVID-19 without you.

Being fully vaccinated & boosted cuts down chances of going to the ER or being hospitalized by over 90%!

Wear Your Mask
Facial barriers not only protect you from disease, they also stop you from spreading the virus to your cellmate or visitors.

Keep Your Distance
People who test positive but do not show symptoms can still spread the virus. Keep a distance of at least six feet from others.

Follow Public Health Protocols
Your health and well-being are important to us. Following COVID-19 guidance keeps you and everyone around you safe.

GET VACCINATED!
