Vaccination may be required depending on assignment or location. For those entering or working in health care settings, vaccination is required. For all other contractors, consult the network contractor.

All unvaccinated or partially vaccinated volunteers and contractors in a CDCR institution/facility shall follow current testing directives at the institution.

Face coverings are not required for those in non-institutional locations, however they are still strongly recommended. All volunteers and contractors who enter or work in isolation or quarantine areas should be fit-tested and wear an N95 mask at all times, with limited exceptions as with eating/drinking, sitting alone in an office, or outside and at least six feet from others. Those who do not enter or work in isolation or quarantine areas should always wear a procedure mask while on CDCR institution/facility grounds.

Quarantine

Volunteers and contractors identified as a close contact to a positive COVID-19 case must quarantine for seven calendar days. Upon return to a facility, must be asymptomatic before performing duties.

Isolation

If a volunteer or contractor tests positive, they must self-isolate for a minimum of 10 days and be asymptomatic prior to returning to a CDCR facility/institution.

On and after March 1, 2022, the assignment for registry providers and contractors who have neither requested nor received a religious or reasonable medical accommodation and remain non-compliant with vaccination, booster, and testing mandates shall be ended.

All volunteers and contractors entering CDCR correctional institutions will complete a daily self-screening for COVID-19 symptoms and exposures.
